

**Nebraska Psychological Society
Undergraduate Research Conference
November 18, 2023
Doane University
Crete, Nebraska**

Conference Program

Participating Institutions

Bellevue University
Doane University
Hastings College
University of Nebraska at Lincoln
University of Nebraska at Omaha

**THANK YOU TO THE FOLLOWING GROUPS AND
INDIVIDUALS FOR THEIR SUPPORT AND ASSISTANCE**

Patty Lavelle & the Doane University Office of Campus Events

Doane University Technology Support Services

Doane University Safety Office

Fresh Ideas Food Services

Dr. Jerome Lewis, Bellevue University

Doane University student assistants and moderators

Doane University Service Bureau

Administrative assistant Missy Persing

A special thank you is extended to the faculty from around the state who volunteered to provide feedback on the presentations.

Nebraska Psychological Society Undergraduate Conference
Saturday, November 18, 2023
Doane University (Crete, NE)

Conference Schedule Overview

7:30am	Registration opens on 1 st floor of Lied Science & Mathematics Building
8:00am to 9:00am	All poster presentations should be posted to assigned locations prior to 9am and left in place for the entire morning so that attendees can read them throughout the conference.
9:00am to 10:00am	Oral presentation session 1 (Lied 152)
9:15am to 10:15am	Poster session 1 (Authors of posters 1-8 should be available for questions and feedback on first floor of Lied)
10:15am to 11:15am	Oral presentation session 2 (Lied 152)
10:30am to 11:30am	Poster session 2 (Authors of posters 9 to 17 should be available for questions and feedback on second floor of Lied)
11:45am to 1:15pm	Lunch and Keynote presentation, Perry Campus Center (South Dining Room)
Approximately 1:15	NPS Business Meeting (location South Dining Room in Perry Campus Center)

Conference attendees giving oral presentations are welcome to use **Lied 131** to practice.

Refreshments are provided for all conference attendees in **Lied 160**

Faculty who are giving feedback on presentations (“judging”) are welcome to use **Lied 252**. Please leave your feedback in Lied 252 before you leave the conference today.

If you are in need of technical assistance with a presentation room (e.g., the computer, the projector, etc.), we have someone available to help in **Lied 153**.

Guest wireless access:

- Open Wi-Fi settings and connect to "Doane Guest" > Click Connect
- Open browser (Explorer, Chrome, Firefox, Safari)
- Check box to Accept terms and click Continue

Oral Presentation Schedule and Locations—NPS Convention Nov. 18, 2023

9:00 – 10:00 ORAL PRESENTATION SESSION 1 LIED 152

9:00

Feeling Nostalgic in an Unfamiliar Setting - Measuring Motivation Using BISBAS Scale

Author: Tibor Stankovic

Bellevue University

Oral Presentation - empirical

Faculty Sponsor: Dr. Jerome Lewis

Despite the general knowledge that nostalgia is a powerful emotion experienced cross-culturally, little research has explored its effects on affective states and motivation. Using a quasi-experimental design, my study found differences in behavior responses and negative affect between a nostalgia-induced group and a control group within a multinational sample.

9:15

Perceptions of Gender Roles as Predicted by Religiosity and Genetic Essentialism

Authors: Torie Tucker and Olivia Vore

Doane University

Oral Presentation - empirical

Faculty Sponsor: Brian Pauwels

This study examines the correlations between religiosity, beliefs in genetic essentialism, and perceptions of gender norms. Students completed a survey and responded to hypothetical legislation proposing a ban on gender affirming care for minors. Participants indicated whether or not they approve of the bill.

9:30

Fostering Open-Mindedness and a Global Community in the Rural Midwest: An Inquiry into the Experiences and Perceptions of Bilingual College Students

Authors: Riley S. Lanning & Nils N. Schaefer

Hastings College

Oral presentation--empirical

Faculty Sponsors: Dr. Stephanie Furrer & Dr. Juliana Cardoso

This study explores the experiences and perceptions of bilingual students in rural Nebraska. Focus group participants discussed the strengths of being bilingual and recommendations for strategies to improve communication in a monolingual culture. The findings indicate that bilingual college students provide opportunities that foster open-mindedness and globalization in the rural Midwest.

9:45

Do Specific Personality Traits Correlate with Competitiveness

Authors: Kayla Miller & Benji Dobler

Doane University

Oral Presentation - empirical

Faculty Sponsor: Brian Pauwels

We looked at specific personality traits and their correlation with competitiveness. The personality traits include agreeableness, perfectionism, social comparison, and optimism. Participants answered a survey from previously published tests that assessed these variables.

Poster Presentation Schedule—NPS Convention Nov. 18, 2023

9:15 – 10:15 POSTER SESSION 1 Hallway, 1st floor Lied

Poster 1

The Moderating Effect of Parental Attachment on the Effects of Victimization on School Absenteeism

Authors: Emily Lamilla and Jon B. Santo

University of Nebraska at Omaha

Poster presentation--empirical

Faculty Sponsor: Dr. Jon B. Santo

School absenteeism can be rooted from several factors, for example, victimization. This study examined the potential buffer of parental support on the association between peer victimization and school absenteeism in a large sample of Brazilian adolescents. Results demonstrated that parental support did moderate the effect of victimization on missing school.

Poster 2

Influences of Friendships and Victimization Within Peer Relations of Adolescents

Authors: Heather Mellor-Poland, William M. Bukowski & Jonathan B. Santo

University of Nebraska at Omaha

Poster presentation--empirical

Faculty sponsor: Jonathan B. Santo

The current study assessed the degree of peer victimization, friended and unfriended adolescents, and stable and unstable relationships over a two-wave longitudinal analysis of 184 adolescents in grades 5th and 6th from Montreal, Quebec, Canada. Students completed peer nomination questionnaires of victimization along with measures of depressed affect.

Poster 3

Effects of Exposure to Object Associated with Evil on Primal Beliefs

Authors: Kathryn Cunningham, Kjirstin Swenson, Lillian Bryson

Bellevue University

Poster Presentation - empirical

Faculty Sponsor: Jerome Lewis

Enchanted objects exist in countless myths. However, little is understood about the effects of these objects on behavior. My study examined whether exposure to objects associated with evil (OAE) influences beliefs. Results indicated that viewing OAEs led to stronger beliefs that the world is an evil and unsafe place.

Poster 4

Differential Rearing and Sex Influence 5-HT_{2A} Receptor Activation and Hallucinogenic Drug Profiles

Authors: Kelsey Lowe, Josh McCarroll, Celia McCaslin, Jade Escarsega, Erik Garcia, PhD

University of Nebraska at Omaha

Poster Presentation - empirical

Faculty Sponsor: Erik J. Garcia, PhD

Social isolation increases chronic stress and serotonergic 5-HT_{2A} receptor expression, possibly inducing maladaptive coping in substance use disorders. Male and female rats were reared in enriched or isolated environments before undergoing treatment with 2,5-dimethoxy-4-iodoamphetamine. Our findings suggest social environment and sex are factors to consider when using hallucinogens as therapeutics.

Poster Presentation Schedule—NPS Convention Nov. 18, 2023

9:15 – 10:15 POSTER SESSION 1 (continued) Hallway, 1st floor Lied

Poster 5

The Impact of Flourishing on Changes in Brazilian Adolescents' Negative Affect During the COVID-19 Pandemic

Authors: Olivia R. Carusi, Hellen Tsuruda, Bianca Nicz, Josafa da Cunha, Jonathan B. Santo
University of Nebraska at Omaha

Poster Presentation - empirical

Faculty Sponsor: Dr. Jonathan Santo

Negative affect is pervasive among many adolescents, while others flourish across several domains. Using multilevel modeling, the current study explored the effect of flourishing on negative affect across time in a sample of Brazilian adolescents. Significant school-level variability was found, revealing possible implications for the nature of school environments.

Poster 6

Gender differences in reporting on bias-related victimization experiences in a university setting

Authors: Madi K. Pfeiffer, Kyle R. Siddoway, Ph.D., Patrick T. McGonigal, M.A., M.L.S, Rosa Viñas-Racionero, Ph.D., & Mario J. Scalora, Ph.D.

University of Nebraska-Lincoln

Poster Presentation - empirical

Faculty Sponsor: Dr. Mario J Scalora

When students report concerning behaviors, campus prevention strategies can effectively mitigate violent behavior. The present study found gender differences in reporting concerning behavior by victims (n = 271) via formal and informal channels and differences in physical and non-physical victimization. The study has implications for how university officials encourage reporting.

Poster 7

The Effects of Peer Relationships on Sleep Quality During Adolescence

Authors: Jason Le, William M. Bukowski, Johnathan B. Santo

University of Nebraska at Omaha

Poster Presentation - empirical

Faculty Sponsor: Jonathan B. Santo

We assessed the relationship between peer relationships and sleep quality among 180 adolescents. Participants self-reported their quality of sleep for the past week and who their friends were and degree of closeness. A significant association was displayed in sleep quality between participants if they classified their peer as a friend.

Poster 8

Resilience Factors in Adolescents' Cybervictimization Experiences and Their Impact on School Anxiety

Authors: Lizzie Finn & Jonathan Santo

University of Nebraska at Omaha

Poster Presentation – empirical

Faculty Sponsor: Jonathan Santo

We explored the correlation between cyber victimization and school anxiety in adolescents. We were interested in finding those who demonstrated high levels of resilience to combat this victimization. Using OECD surveys from 60,000 participants, they reported their experiences. Our results revealed resilience moderated the cyber victimization and school anxiety association.

Oral Presentation Schedule and Locations—NPS Convention Nov. 18, 2023

10:15-11:15 ORAL PRESENTATION SESSION 2 LIED 152

10:15

Applicant's Substance Use & Financial Standing Influences Impressions

Authors: Sharyn Gappa & Whitney Walter

Doane University

Oral Presentation - empirical

Faculty Sponsor: Brian Pauwels

This scenario-based study examines the impact of substance use and financial standing on the impressions of a student who is being considered for acceptance into a student organization on a university campus.

10:30

College students' attitudes towards seeking mental health services

Authors: Jose Valdez & Trey Yates

Doane University

Oral Presentation - empirical

Faculty Sponsor: Brian Pauwels

This study explored how college students' attitudes toward seeking mental health services relate to right-wing authoritarianism, locus of control, and centrality of religiosity. Surveying 75 college students, we found no significant correlations between these variables and help-seeking attitudes. Other unexplored factors may influence these attitudes, necessitating further research.

10:45

Adolescent Algorithm Addiction: How Specific Social Media Platforms Impact Phone Addiction & Mental Health

Author: Canyon Skare

University of Nebraska at Lincoln

Oral Presentation – empirical

Faculty sponsor: Calvin P. Garbin

This research utilizes secondary analysis of data from the Adolescent Behavioral and Cognitive Development study through the National Institute of Mental Health to develop a multiple-regression path-model that describes relationships between specific Social Media platforms (Facebook, Instagram, Snapchat, etc.) and negative mental health outcomes (anxiety, depression, phone addiction, etc.).

11:00

Lions, tigers, and men? Obstacles and influence of belonging

Authors: Lauren Behnk & Meklit Aga

University of Nebraska- Lincoln

Oral Presentation - empirical

Faculty Sponsor: Chelsea Witt

Across 3 classes consisting of 176 total students, university and course belonging were consistent predictors for course engagement, including reading and attendance. Belonging also impacted rates of procrastination; additionally, first generation status, SES, and gender were influential demographics. These results highlight the impact of both university and course level belonging.

Poster Presentation Schedule—NPS Convention Nov. 18, 2023

10:30 to 11:30 POSTER SESSION 2 Hallway, 2nd floor Lied

Poster 9

Dynamics of Peer Victimization and Self-Esteem in Brazilian Adolescents: A Focus on Gender Minority Youth

Authors: Albina E. Yurtova, Bianca Nicz, Hellen Tsuruda, Alexa Martin-Storey, Josafa Da Cunha & Jonathan B. Santo

University of Nebraska Omaha

Poster Presentation - empirical

Faculty Sponsor: Jonathan B. Santo

Our study examined the impact of peer victimization on self-esteem in Brazilian adolescents, as influenced by gender identity. Structural equation modeling confirmed the negative influence of victimization on self-esteem in cisgender boys, girls, and gender minority youth (GMY) as well. Notably, GMY reported significantly more victimization and significantly lower self-esteem.

Poster 10

Amygdala response to socioemotional stimuli in those who use methamphetamine in relationship to past trauma

Authors: Kennedy Kadlec, Mai Pham, Robert Roy, Nicholas Hubbard

University of Nebraska-Lincoln

Poster Presentation - empirical

Faculty Sponsor: Nicholas Hubbard

Traumatic experiences are exceedingly common among those who use meth and these are known to influence emotional brain responses. We examined the extent to which past trauma related to amygdala responses to socio emotional stimuli in people who use methamphetamine come with or without post traumatic stress disorder.

Poster 11

The Impact of General Self-Worth on the Effect of Negative Peer Experiences to Barometric Self-Esteem of Early Adolescents

Authors: Heidi L. Heyden, Ryan Adams, William M. Bukowski, Jonathan B. Santo

University of Nebraska at Omaha

Poster Presentation - empirical

Faculty Sponsor: Jonathan B. Santo

We explored the role of adolescent general self-worth on the association between negative peer experiences and experiential self-esteem. Using 112 young adolescents, participants reported their interactions, self-esteem four times each day and their overall self-worth. As predicted, general self-worth buffered the association between negative peer experiences and experiential self-esteem.

Poster 12

Serotonin 2A Receptor Agonist 2,5-Dimethoxy-4-iodoamphetamine Diminishes Fentanyl Reinforcer Value Differently in Male and Female Rats

Authors: Alice J. McQueney & Erik J. Garcia

University of Nebraska at Omaha

Poster Presentation - empirical

Faculty Sponsor: Erik J. Garcia, PhD

The serotonin 5-HT_{2A}R modulates reward value. Here, we systemically activated the 5-HT_{2A}R with 2,5-dimethoxy-4-iodoamphetamine in rats and examined its effect on fentanyl self-administration through a behavioral economic approach. Fentanyl demand elasticity and intensity were dose-dependently decreased, in males and females, respectively, validating it as a therapeutic target for opioid misuse.

Poster Presentation Schedule—NPS Convention Nov. 18, 2023

10:30 to 11:30 POSTER SESSION 2 (continued) Hallway, 2nd floor Lied

Poster 13

Effects of Early Adolescent Body Image and Gender Typicality on Self-Esteem

Authors: Sophia L. Lord, Mithra H. Pirooz, Jonathan Bruce Santo, & William M. Bukowski

University of Nebraska at Omaha

Poster Presentation - empirical

Faculty Sponsor: Mithra H. Pirooz

Research has shown that body dissatisfaction has been associated with negative adjustment outcomes for children and adolescents. The current study examined the moderation of gender typicality on the relationship between body image and self-esteem among early adolescents. Gender differences in body image and self-esteem were also considered.

Poster 14

Differences Between LGBTQ and non-LGBTQ College Students in Perceived Psychological Stress and Coping Strategies

Author: Alexandra Richards

Hastings College

Poster Presentation - empirical

Faculty Sponsor: Dr. Rachael Robinson-Keilig

The study's purpose is to investigate the appraisal of psychological stress and engagement of coping strategies between LGBTQ and non-LGBTQ college students. The Perceived Stress Scale and Ways of Coping Questionnaire-Revised will be used. The results will show if there is a difference between these students with stress and coping.

Poster 15

Unraveling the Complexity of Negativity Bias and the Role of Mental Imagery

Author: Nils Schaefer

Hastings College

Poster Presentation - empirical

Faculty Sponsor: Dr. Robinson-Keilig

This project explores negativity bias by examining how image processing methods, valence, and mental imagery impact memory recall. It is hypothesized that mental imagery of affective images intensifies negativity bias. The experiment is designed through PsychoPy. This study hopes to gather insights into cognitive processes and valence memory recall phenomena.

Poster 16

Peer acceptance in children as a function of teacher-ratings of ADHD: An analysis of peer group perceptions of effort

Authors: Promise Moore-Saufley, Felicia Meyer, William M. Bukowski, Jonathan B. Santo

University Of Nebraska at Omaha

Poster Presentation - empirical

Faculty Sponsor: Jonathan B. Santo

We examined the association between peer acceptance and ADHD behaviors among 141 adolescents. Participants were asked to rate a possible same-gendered classmate that exhibited ADHD behaviors. As expected, adolescents who themselves exhibited ADHD-like behaviors were less accepted by their classmates, however, peer group perceptions of effort moderated this effect.

Poster Presentation Schedule—NPS Convention Nov. 18, 2023**10:30 to 11:30 POSTER SESSION 2 (continued) Hallway, 2nd floor Lied****Poster 17****5HT_{2A}R Agonist 25CN-NBOH Does Not Reduce Analgesic Effect of Fentanyl**

Authors: Carter J. Richardson, Erik J. Garcia

University of Nebraska at Omaha

Poster Presentation Empirical

Faculty Sponsor: Erik J. Garcia, PhD

Opioids are the most effective analgesics but have significant abuse liability. Serotonin 5-HT_{2A}R agonists reduce fentanyl reward but it's unclear if 5-HT_{2A}R agonists reduce the analgesic effects of fentanyl. Selective 5-HT_{2A}R activation does not alter the efficacy of fentanyl in male or female rats in the hot plate nociception assay.

**Lunch at 11:45 in
South Dining Room of Perry Campus Center**

12:15 to 1:15 Keynote speaker—Dr. Jerome Lewis

**Counterfeit Victims: People's Reactions to
Illegitimate Victim Role Claims**

Victim status is a well-defined social role within society. Deserving victims receive numerous social goods ranging from social support to financial support. However, unqualified claims to the victim role can lead to severe social consequences. This talk will describe the ideal victim and how people respond to failures to achieve this status.

Dr. Jerome Lewis is an Associate Professor in Psychology at Bellevue University. His research focuses on the victim role and the psychology of morality. Dr. Lewis has a keen interest in service and the teaching of psychology. In 2022, he received BU's Excellence in Service Award. In 2023, he became an APA PsycLearn Faculty Advocate.

The Journal of Psychological Inquiry (JPI)
An undergraduate research journal
Call for papers
<https://www.psychinquiry.org/>

Managing Editor: Dr. Ken Sobel
 Dept. of Psychology and Counseling
 University of Central Arkansas
 Conway, AR 72035

Send an email to the managing editor at: jpi@uca.edu

The *Journal of Psychological Inquiry* accepts submissions for review on a rolling basis; after writing a manuscript, submit it to JPI by navigating to our online submission portal: www.editorialmanager.com/jpi.

- Manuscripts must have an undergraduate student as the primary author. Manuscripts written by anyone who has already graduated from college will be accepted if the work was completed while the primary author was still an undergraduate student. Graduate students or faculty may be co-authors, if their role was one of teacher or mentor versus equal collaborator.
- Include a sponsoring statement from a faculty supervisor. Faculty sponsors should confirm that they inspected the paper's content, method, adherence to APA style and ethics, grammar, and overall presentation. This sponsoring statement should be uploaded with the manuscript.
- For a manuscript to be considered for publication in JPI, the first author must meet one of the following conditions: a) the primary author has paid a one-time \$30 processing fee, or b) the primary author is or was a student at an institution that has paid an annual \$80 processing fee for unlimited submissions from students who attend that institution
- Submit original manuscripts only. Do not submit manuscripts that have been accepted for publication or have been published elsewhere.
- All manuscripts should be formatted in accordance with the latest edition of the APA Publication Manual.
- The reviewing process should normally require 60 days between submitting a manuscript and receiving a reply from the action editor.
- If a manuscript requires revisions, the author or authors are responsible for making the necessary changes and resubmitting the manuscript to the journal. Manuscripts may need to be revised more than once before being accepted for publication.

The *Journal of Psychological Inquiry* publishes each of the following kinds of articles.

- Empirical studies
- Literature reviews
- Historical articles
- Special features I: Evaluating controversial issues.
- Special features II: Conducting psychological analyses – Dramatic
 - This type of article is a psychological analysis of a television program or movie.
- Special features III: Conducting psychological analyses – Current events
 - This type of article analyzes a current event.
- Special features IV: Teaching techniques
