

ISM 498 Senior Seminar II: Project Conceptualization

Winter I Term 2017
Tuesday Evenings

Instructor: Steven Millet
steven.millet@doane.edu

COURSE DESCRIPTION:

In this course, students will continue the development of the project identified in ISM 497. Satisfactory completion of this project, including a written and oral presentation, will demonstrate a solid understanding of the major, as well as the confidence and skills to work with existing and emerging aspects of the professional field, to do independent research and effective problem-solving, to communicate effectively, and to demonstrate a synthesis of the project with career plans and intentions. *Prerequisite ISM 497* (3 Credits)

Students will demonstrate the following learning outcomes of the major:

- Uses analytical and creative thinking skills to gather and analyze information, to identify and solve problems, to determine potential outcome alternatives, and to make appropriate decisions.
- Recognizes ethical issues involved in information technology and its management. Has the ability to use critical and analytical thinking skills for improvement of organizational communication.
- Understands information science and technology concepts and processes, their relationships to each other, and their relationships to existing and emerging computing technologies.
- Has the confidence and skills to learn independently and apply existing and emerging computing and technologies and processes.
- Has the confidence and skills to solve an unknown problem and to efficiently research, learn, and apply an unknown topic or skill to novel problem-solving situations.
- Reads with comprehension.
- Listens effectively and accurately interprets nonverbal communication.
- Writes in clear, concise, and grammatically correct English.
- Speaks in clear, concise, and grammatically correct English.
- Has the ability to work collaboratively with others.
- Has the ability to plan and deliver effective oral presentations to audiences of all sizes.
- Has the ability to tailor the nature of the communication to maximize understanding in the intended audience, including those with different levels of education and different cultural backgrounds.
